ELECTRONIC: Industrial, METAL: Industrial Metal Details: Gloria Nuda is a project born in May 2003 by the arty minds and hands of :Teryan - programming, vocalsMr Ntr - programming, vocals, lyrics. The electro-industrial duo started recording their debut album Dictate From Beyond in January 2005. This is a concept based on a novel about a secret alien domination, narrated in first person by an abductions victim. The protagonist sees his life completely destroyed by this terrible experience and tries to find a new equilibrium between the obsessing flashbacks and his senseless daily life. Writing the lyrics, Teryan and Mr Ntr tried to find an innovative solution using two voices with different melodic approaches: in fact theres many monologues and spoken parts interpreted in a very theatrical way. The music is also quite various, as much as the vocals are, covering a wide spectrum of sounds and textures and reflecting the lyrics mood, varying from classic harsh electro to epic industrial songs. The album writing and recording process was terminated in May 2005, exactly two years after bands foundation.
