Post-Geek-Synth-Rock 5 MP3 Songs POP: with Electronic Production, ROCK: Noise Details: Puppetbox was formed out of the necessity to play all those songs we wrote in high school but just never fit into a genre. We love dirty vintage synth sounds, distorted guitars and punk rock drumming. Not a complex formula but any style sounds good if the songs don't suck. And really that is all we try to do; play songs that we would like to listen to. Except our drummer hates all our music.
