Talent, presence, style and versatility these are the makings of an unforgettable musical artist. In today's world of cookie-cutter idols, and studio-manufactured talent, rarely do you find them all in one person. JAYSiN, a singer/songwriter from California, is an artist with all these attributes and more. JAYSiN began singing at age 6, and since then, singing, performing, and songwriting have been his passions. Growing up in the Bay Area exposed him to the edgier side of R&B and rap, which shows through in his writing, stage presence and energy-filled performances. Now residing in Los Angeles, JAYSiN has performed at some of the hottest Hollywood clubs, in front of audiences of 20,000+, and private industry parties. JAYSiN is a hip-hop inspired pop artist - more of an MC than just a singer. His influences include old school funk and R&B icons such as George Clinton, Roger the Zapp Band, and Hi-Five. His style is akin to Prince, George Michael, T. Pain, and R. Kelly all amazing live performers. JAYSiN believes the true test of a singer is how you sound live no tricks, no effects, just talent. In addition to his strong vocal abilities, he does his own back vocals, stacks and creates intricate harmonies and arranges his songs. Word of his talent as a musician, and his gift for clever lyrics and provocative hooks has already led him to work with many talented and respected industry people. Most recently he teamed up with Qwes of Konvict Muzik Group and collaborated on the well-received single, Goddy Body. A hardcore performer, JAYSiN is building a loyal fan base by infusing

the rawness of hip-hop with the universal appeal of pop to create something that is not only marketable, but truly unique and transcends genres. JAYSiN's sound and ability to write songs with chart-topping power, along with his image and exciting shows, guarantees he will be making headlines. JAYSiN has also caught the attention of Hollywood with his music appearing on feature film soundtracks and commercials. JAYSiN continues to write his own material, expanding his already impressive library of fun, funky and eclectic original music, and collaborate with other artists and producers.
