Ever felt your phone was going to ring, right before it did? Premonition? Why does that word even exist? Because it happens to normal people from all around the globe...a lot!! Tim McGowans latest CD, Phenomena Legends Myths, wont answer questions, but it will capture your imagination take you on a inspiring inner journey, and may just have you asking your own questions at the journey's end! Pete Havey, Mystic Soundscapes, had this to say about Tim's latest CD: "This album BLOWS ME AWAY! Seriously, what an incredible piece of work this one is. A lot of times subsequent efforts by artists fall WAY short of the mark, but with each album Tim McGowan has gotten better. This cd is definitely my new McGowan favorite - it's got it all - dream-states, chilled soundscapes, inspiring riffs... I love hearing that guitar in his work - it brings a whole different level to the sound of this type of music. One of my favorite tracks, many of our listeners, from his previous CD Kingdom is The Long Journey Home several tracks on this new CD have that similar powerful sound. Its an amazing performance featuring Tim's signature musical stylings. His innate ability to fuse many styles genres into one cohesive whole results in an album that, while vaguely reminiscent of David Arkenstone's cinematic storytelling, is in the end pure Tim McGowan. Each song has its own personality - the album is mysterious, adventurous, intriguing inspiring. This will become one of your favorites in the McGowan collection! Check it out be ready to buy, because you're going to love what you hear!
