Classic Glasgow indie written before 9/11 11 MP3 Songs POP: New Wave, ROCK: Punk-Pop Details: In the year 2000 the Battered and bruised Catcher went in to record their 2nd Album which became known as Sex Death Trains and America. This album produced a wealth of songs and styles developing and pushing the band further than they had gone before. The result is a quite stunning collage of songs about the human condition. Everything was thrown in to the pot both lyrically and musically and with the assistance of Scott Williams and a first class producer called Geoff Alan they produced what many believe to be their finest work. Now for the first time in North America this album has been released revealing the classic indie feel of the legendary Glasgow band. (Note Despite the title this album was written before 9/11)
