

Mp3 Charlie Jackson - The Steps We Take

[DOWNLOAD HERE](#)

Elegant piano solos; think Jim Brickman w/o the singing, George Winston w/o the fame. New age, contemporary classical compositions. 14 MP3 Songs NEW AGE: Meditation, EASY LISTENING: Mood Music Details: Imagine Jim Brickman without singers; George Winston without fame. This CD contains that same type of elegant piano music. It will transport you ('out to sea'), cause you to daydream ('chasing clouds'), and look inside ('the steps we take'). This is music to relax to, meditate to or rest to. Reminiscent of early 20th century compositions, it contains melodies you'll remember and music you'll fall in love with. The composer is Charlie Jackson; classically trained from age 5. After a 40 year musical journey, he found this contemporary classical style to be his best fit and passion. Here he picks up on the career he should have focused on 35 years ago instead of taking the easy way out and just paying the bills. If he had recorded his life, this would be the playback without the distractions. In it you can hear the joy, sorrow, fun, love and tragedies of a lifetime. If you like peaceful piano, this is for you. This music is best when the listener can dream a little and doesn't have to pay too close attention. If you like elegance or simplicity, clouds or sun, you'll love this music. This is the dream coming true. The tracks on this CD can be the perfect background or a pleasant foreground of sound; it is beautifully peaceful, meditative, introspective; a life's passion. Presented to you: 14 pieces intended to provide audio tranquility and intellectual interest.
