Details: "Ambitious, visionary and ultimately gorgeous. Charlie North is the Gods' nectar of ambient music." Nick Luscombe, Flo- Motion, London's 104.9 Xfm "Charlie is widescreen musical genius." Gordon Loncaster, Virgin Radio Raised in Yorkshire, Charlie grew up surrounded by music. He started playing in bands and performing at concerts from an early age. A chance meeting with a record producer meant that he pressed his first record at the age of 11. We sold the record to the other kids at school, it taught me a great deal and showed me that theres a lot more to the music business than just making music notes Charlie. After school (and armed with two diplomas in sound engineering) Charlie took up residence as studio manager with the influential dance label UDG. Based in Leeds (and distributed via Eastern Bloc) this extremely successful time saw the label release a series of highly influential underground hits. Tracks such as On Your Todd and Freebase would go on to receive critical acclaim from both the underground and mainstream music press. Charlie later moved to London and became involved in a variety of studio sessions, engineering and producing at Abbey Road, Swanyard, and Mayfair studios. He was also lucky enough to be one of last musicians to ever perform live at the original Marquee Club.
