Intelligent pop-Americana with soulful vocals, catchy melodic hooks, and thoughtful lyrics. 7 MP3 Songs

POP: Quirky, COUNTRY: Americana Details: Propelled by groove, energy, and a theatrical performance style, Laura Benjamin and her dynamic band are the next big thing on the Atlanta pop-rock music scene. With eclectic use of Latin beats, jazz chord progressions, and even country-style three-part harmony, the music is innovative and multi-dimensional. Influences include Fleetwood Mac, the Corrs, the Dixie Chicks, Rufus Wainwright, the Eagles, R.E.M., and Sarah McLachlan, with a nod to the jazz greats like the Gershwins, Duke Ellington and Irving Berlin. Benjamin places emotional honesty at the heart of her songwriting; several of her songs are reflections of love and loss. Still other songs capture more whimsical concerns standing on ones own, putting down roots in unexpected places, even musing over the fate of no-longer-planet Pluto. Her lyrical style is both quirky and accessible, while her knack for catchy melodic hooks gives the songs a universal appeal. Benjamin began her full-time music career shortly after graduating from Yale University in 1999. From 2001 2004, she and several of her current bandmates performed widely around the southeast as members of the swing band The Zoots, with Benjamin as a lead vocalist and keyboard player. Since then, she has also performed extensively as a solo artist, been a featured member of a musical satire troupe, and been involved in several other bands. In 2006 Benjamin wrote, arranged and began performing the powerful originals featured on her debut album, let it go.
