Ambient drone based rock to funky noise and melody inspired mayhem, the musical pallet is diverse and not always whats expected. 13 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Down Tempo
Details: "Its the best downtempo album youve never heard of." groundliftmagazine.com "There's not a gimmick to be found here -- it's just a collection of twelve four minute songs that exist as ends unto themselves, and though its premise is none too exhilarating, its results are -- and then some."
splendidmagazine.com "...their music is just lovely...The music itself covers so many grounds - some parts Sigor Ros with the xylophones and cellos - some parts mixing steady beats with cranky bass guitars - this stuff is awesome. I'm really excited about the new album." velvetgrooves "Whether it's a string arrangement, a train, the wind, or the members playing several different instruments, these guys just have a knack for making music with soul." domaincleveland.com "Low In The Sky surprised me. They're simple with their complexity, and the lack of lyrics doesn't bring their intensity down. Recommended for fans of Four Tet, Department of Eagles, Boards of Canada, and Prefuse 73." whoneedsradio.com
