Modern New Wave fused with Indie Rock 9 MP3 Songs POP: New Wave, ELECTRONIC: Pop Crossover
Details: POM POM DIARY began as a late night experiment in the fall of 2004. Combining Paul Fontana's experience as a rock musician and Paul Finch's extensive electronic knowledge as a DJ, they formulated a type of music they had never heard, yet wanted to play. Propelled by contagious lyrics and a mixture of synth pop and guitar, POM POM DIARY's postmodern sound is the perfect soundtrack for the cityscape. While POM POM DIARY may remind you of the past it certainly has no intention of staying there. The synths are retro, the guitar is almost common and the drums are simple, infectious beats that one can dance to - but doesn't have to. New Wave is something POM POM DIARY hears a lot when they are listened to or played on the radio, then sometimes they are simply part of that all encompassing now ultra-important Indie scene. In the end POM POM DIARY is all of these things.
