Ambient, Breakbeat/Breaks, Dance, Down Tempo, Drum 'n Bass/Jungle, Experimental, Funk, House, Industrial, Pop Crossover, Soundscapes, Techno, Trance, Trip Hop Virtual Orchestra, Electric Blues, General, Power Pop, Glam, Island, World Beat, World Fusion 6 MP3 Songs ELECTRONIC: House, ELECTRONIC: Industrial Details: SimplyJason began DJing in 1989 playing Breakbeat Drum Bass after meeting two lads from London England while on vacation in Orlando Florida. These two individuals (Raymond Damian) traveled from Orlando to Clearwater for the better part of the week to become very close friends. After returning to Toronto, SimplyJason discovered a parcel of records in the mail, and later received many more which truly motivated him to develop his mixing skills. Several years later, and moving into house and Techno after being introduced to DJ Bliss (Switch Records Plus8 Recording Artist), SimplyJason found his calling... Spending much time learning his new genre with Bliss, and also doing some work in the studio with Himadri (Switch Owner) allowed for a broader perspective of influences than his initial roots... In 1998, SimplyJason began to build a studio with only a 4mb Sampler (to which he released an unmastered minimal CD under the artist "THISguythatGUY"). Since that point, SimplyJason has spent the last few years honing his skills in both the analogue (48trk studio) and digital (Logic Pro Tools) realms. Having worked in Film as a Sound Effects editor for 7 years (nominated for a Gemini) allowed SimplyJason to develop his sound design capabilities... This is what led to the true sound that is now recognizable as SimplyJason... Not one for using many presets, etc... He spends most of his time re-sampling his own loops, and layering his sounds with such depth that after listening through a complete mix, the listener is able to hear different sounds with each experience... This is the unique quality found in the sound created by SimplyJason. With each opportunity to listen to a complete set composed by SimplyJason the listener is able to grasp the depths within this creative mind... Having

researched both the psychology of sound and influences on brain patterns in relation to pattern and frequency response, older music produced by SimplyJason is more a type to be played in the background and take you on a journey than it is dancefloor music. His newer projects however, focus on the future and development of these exposures and intertwine the approaches of earlier material in a new direction. All music produced by SimplyJason for Intents Records is available through the music links here, in iTunes, etc. Download today to allow a deeper connection and to understand the overall perspective and the philosophy behind the sound design experience of SimplyJason. Myspace will provide you with clips of new material being mixed by SimplyJason as well as provide links to mixes, etc. from other sites.
