Acoustic inspirational songs in the Mong language accompanied by a simple mixture of guitar fingerstyle and strumming. 10 MP3 Songs in this album (30:57)! Related styles: WORLD: Asian- Southeast, FOLK: Fingerstyle Details: In theory a good piece of music is logically and well planned out but what The Mong Cowboy discovered is that inspiration and simplicity are the most important factors that led him to the creation of this guitar and voice only style of music which lies somewhere between folk, rock, and country. At the lowest point of his life, and with little that he knew about the guitar and music from a mere semester of high school guitar lessons, he worked hard to put this album Tseg Tau 30 Xyoo together. These are songs of love and redemption that are primarily based on his own personal life and struggles.
