

External Canal Boat Atmos Bow Diesel Engine Sound Effect Sfx

[DOWNLOAD HERE](#)

This sound effect is a stereo recording recorded from the bow (front) of an English canal boat. You can clearly hear the quiet chug of the diesel engine, plus the gentle trickle of water as it splashes calmly against the front of the boat. Also see our other canal boat recordings of passing through a tunnel and different atmoses from within the boat. All files on sale by Sevenleaf SFX have been recorded by professionals and as such are royalty free. They are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
