

## Mp3 Better Late - New World

[DOWNLOAD HERE](#)

Blending elements of Smooth Jazz, Rock, New Age and Latin influences, each tune on this CD gives you something different to explore and enjoy. 9 MP3 Songs JAZZ: Smooth Jazz, WORLD: World Fusion

Details: Better Late gets its name from the old saying "better late than never". It's funny, time really does fly by, whether we are having fun or not! For each of us life brings many opportunities as we move ahead, but for me, creating and producing my original music was one thing I always wanted to do. The thing is that no matter how much time had passed, I always felt like the music was there, just waiting for the right moment to come together. A few years ago, I decided that the time was right to devote myself to producing my original music. I built a studio addition on my house, moved in and started working on what would become "Better Late, New World". A little late to be sure, but New World seems to have been worth the wait! The 9 tunes on the New World CD are all original. I play guitars and guitar synth, Glenway Fripp plays keyboards and bass. Guest drummers include Jean-Luc Imbert, Jack Shanahan and Costas Apostolos. Max Fripp makes a guest appearance playing percussion on "True Story". Jean-Luc Imbert also plays french horn on "Layer". All of the tunes have a different personality, somehow defying genre or comparison and tie together very well as a whole. Listen to some of the samples and hear for yourself!
