A combination of the perfect pop songs with exotic rhythms and the voice of the soul. 12 MP3 Songs  
FOLK: Modern Folk, POP: Piano Show all album songs: The River Songs Details: The River is the latest release to flow from Jacks Waterfall.(October 2007). It features the current Waterfall trio of Guitar, Upright Bass and Cello on tracks like Bella and Crow and Raven. It is also takes some twists and turns with the new waterfall invented piano-percussion set up on a track like One in a Million or the guitar- percussion tapping on the title track. Recorded August 2007 on Easy Street, this CD was like something that was waiting to happen. It started out as a few demos that had that extra something and turned into a spiritual release of emotion and creativity to the point that after one session, I was sitting in a chair meditating and I could see the songs dancing around the room like colorful vortexes of energy, each with its own pattern and colors. I couldnt believe it. I am really getting new age-y now. This is a CD about relationships, making peace with your past and it even has a Siddhartha quote in the liner notes with a Jesus song. All the mixings and matchings of an ever evolving Waterfall. Anyway, kick up your feet, feel the beat and connect with The Rivermusic made easy like me. Peace Jack
