Details: About MODELE Like being pulled into a violent kiss, Modele's songs will haunt you on the dance floor and beyond. Modele drip glamour, drama and sex; what they are putting forth is more than just audio - its an attitude, it's a lifestyle. Starting their own label, Elektrik Records, in early 2008, this 3-piece electro rock outfit has put forth an outstanding array of musical soundscapes. With the seductive vocals and non-resistant drum attack of songs like "Pretending" and "Berlin", to the cutting guitar and synth lines on tracks like "Girl Like You" and "Chemistry", this is the perfect making for a band of the future. Modele's debut record will hit the world in the summer of 2008 and with tours to follow, be sure to not to miss this live experience; it will leave you feeling an indescribable hunger for more. Music without substance has no sustainment, so lets all get ready for something to remember. "If you like bands who have a really strong image, are hugely into fashion and are big into their electronica and synths, then you'll love Modele." Aoife Barry, Sweet Oblivion Blog "Modele's upcoming full-length release is shaping up to be one of the most addictive records of the year; have YOU heard Modele yet?" Shirk Magazine "Modele is pulsating audio shock therapy, a thrashing heartbeat of beats, synths and electro-delights. Haunting and seductive, strobelights and pounding speakers not required" Lonely Vagabond "Modele has amazing style, and I think they are all very talented musicians. I think [they] will show people just how ambitious they are and how much their sound and overall style has matured." DJ Lawrence, Celery Magazine July/08
