

Mp3 Past Present Future - Rockin' The Classics

[DOWNLOAD HERE](#)

Classical music performed by a three piece rock band. (Keyboards, Bass Drums) How do three musicians tackle the music of the great composers originally written for full orchestra or string ensembles? Check it out, you'll be amazed... 8 MP3 Songs CLASSICAL: Contemporary, ROCK: Instrumental Rock Details: Alright! So you find yourself searching the internet for something a little different. You're looking for something that will satisfy your craving for some "real" music. Well then, crank up your computer speakers and check this out! We are a three piece rock band doing classical music. You're not gonna hear some "jazzed-up-supperclub" version of classical music. We are playing it like the composers (Haydn, Vivaldi, Bach, Mozart, Handel, Beethoven, and the contemporary Mason Williams) wrote it. (OK, so we rocked out a little on "Classical Gas") Straight forward classical music performed on the most popular instruments of the day, keyboards, bass and drums. (FYI, the drum parts are original copyrighted compositions by our drummer, because these pieces had no or very little percussion) This is the music of the "Past", performed on the instruments of the "Present", discovering new possibilities for classical music performances of the "Future". Tom Allen, host of CBC radio's classical music show "Music And Company" calls it "tons of energy and drive and lots of cool bass licks." So check out every piece on our album before you decide to purchase it. At \$7.95 (a buck a song) we obviously aren't in it for the money. We are looking for some feedback, good or bad. Should we keep doing what you're hearing or should we hang it up? (We'll probably keep doing anyway 'cos we love what we're doing-and so do our fans). Would you be interested in hearing us live if we played in your town??? May the music of our forefathers live forever in our hearts! Musically Yours, The members of "Past Present Future" Kurt Henkel - Keys Walter LaCourse - Bass Jeff Denney - Drums
