

Mp3 William Verkler - Sound Effects Se001

[DOWNLOAD HERE](#)

Sound effects for movie making 52 MP3 Songs EASY LISTENING: Background Music, ELECTRONIC: Soundscapes Details: While making music for albums or movie scores, I get many requests to provide specific sound effects. This Sound Effects CD is titled "Weather Related" SE001. It has 52 sound effects sequences, from 10 seconds to five minutes long. Each Sequence can include many sound effects. The titles may seem repetitive, but each sequence is different in one way or another. When editing these sounds into a movie using one of the many DVD editing systems, you can take just those portions of the sound effects sequence that work for the scene. It's a lot of fun to do, and this CD gives you lots of choices. The next Sound Effects CD SE002 is titled "Horror Sci-Fi Movie Magic" do it yourself kit. SE002 gives you 96 sound effects sequences. Track (92) "Example", combines some of my music with some of the sound effects to show you how it sounds when you put it all together. You really need to listen to each track completely to hear all of the sound effects included on both CDs. Check the links for more available Music and Sound Effects from William Verkler. I hope you enjoy the effects and are able to use them for your Movies.
