Attention: If you're sick & tired of paying someone else $50.00 to $99.00 to do your graphics, then...

"You're About To Discover An Awfully Simple-But-Powerful System That Can Do All The E-Cover, CD & Membership Pass Works For You ... as easy as 123!" NO Waiting And NO Fancy Graphic Designing Gizmo, Knowledge & Experience Required - As Long As You Can Scroll And Click, You TOO Can Design Superb Covers For Your Digital Products! Dear Friend, Tired of finding yourself paying $50.00 to $99.00 per cover designed for your newest digital product? Don't want to wait another minute for your graphic designer to do the cover design work for you? Perhaps you want to do it yourself. Or do you want to be in business designing covers for other people and rake in easy money? You can create covers for your clients the 123 Go Graphics way and earn whopping $50.00 to $99.00 fees per cover designed. And on top of that, you DON'T need to be superb at creating covers because you'll have a "system" all in place to do the work for you while you simply pont and click! Lucrative, isn't it? Then you must read the rest of this letter. You see, digital products are created around the clock. This includes E-books, software, templates, videos, audios, and the such. Regardless of what niche these products are created for, they each need to

dress to impress - especially if their creators want to make a killing by selling their products online. You could also say that every digital product needs a "face" for their prospects to look at. This is true because since digital products cannot be touched, felt or smelled like their physical counter parts, the only thing that can make them attractive is their visual appearances. While it's a given that a good sales letter plays a very critical role in selling a product, but if your digital product doesn't have a cover to appeal to your prospect, chances are still almost zero in selling to him or her. All in all, It's very hard to be convinced of something good that you cannot see. And that's exactly how important having your own professional product cover is. Now, Here's The Tormenting Part. The problem is: unless you're a graphic designer, you won't have any idea how one could design 3D covers. And if you don't have any idea how one does it, you have to engage someone who knows how to do it - for up to $99.00 per pop. And also, if you an active product creator, you would be spending a lot in cover designs even before you start selling, resulting in covering back your investment taking a longer while. Not good for business! Chances are that you don't have a lot of money. The alternative is that you can design your own covers. Problem, again, is that you don't have a clue as to how to design your own 3D covers. And perhaps you're awful at art. Now you're wishing for a quick and easy solution. You don't know exactly how, but as long as you can save money from having to engage graphic designers (which can be quite a gamble sometimes) and get the beautiful covers you want, you're happy with it. Heck, you'd be happier if you can do it on your own... instantly! You know what? You're in for a treat. Introducing The Awfully-Simple-But-Superb Cover Designing System: 123 GO GRAPHICS Finally! You Can Now Churn Out Unlimited Instant HIGH Quality 3D Covers using the 123 GO GRAPHICS! That's right. I'm going to give you a system that will take your flat covers and do the "3D" work for you! All you need to have is Adobe Photoshop program installed in your computer and this turnkey package and you'll be on way to design unlimited superb covers for your own! So, let's take a sneak peak under the lid: Component 1: 4 Awesome Photoshop Action Scripts You receive four (4) Adobe Photoshop Action Scripts that can take your flat designs and turn them into awesome HIGH quality, 3-Dimension E-covers - instantly! With these action scripts, you can create covers for your: E-Book, Box Cover, Compact Disc (CD), and even Membership Pass! As these scripts come in .ATN format, you only need Adobe Photoshop program installed in your hard drive in order to use them. (Version CS2 and above is recommended for maximum usage of these scripts!) Imagine, creating covers like these at the push of the button! And believe it or not, you only need to take 3 easy

steps in churning out superb covers like those shown above! Here's how: Step #1: Load the action script of your choice in Adobe Photoshop. Step #2: Insert the cover of your choice. Step #3: Push the button and let the script do all the action for you! It really is that simple! But in order to make full use of these awesome action scripts, you need to have... Component 2: 123 GO GRAPHICS Quick Start Hand Book 17 Letter-Size Pages, PDF Format, Instant Download You will also receive a quick start guide to using the action scripts. This is especially helpful if this is your first time using Adobe Photoshop scripts. My manual will show you how YOU can easily use the scripts - step by step - and I can confidently guarantee you'll be able to grasp all of what you need to know about using the scripts to design your covers for you under 60 minutes, possibly half an hour. The guide is written in "easy to understand" English as all the technical jargons have been stripped off so you don't have to worry even if English is NOT your first language! But wait, there's more! Component 3: 20 Professionally Designed Pre-Made Cover Templates Lazy to create your own cover templates from scratch? No problem! Together with the action scripts and manual, you will also receive over 20 professionally pre-made cover templates you can use and edit for your own! That's: 5 E-book covers, 5 Box covers, 5 CD covers, and 5 Membership Pass covers! With these 20 PSD covers, you can edit anyhow you like or simply change the text to suit your preference! And to wrap up the offer, here's something you'll find very useful for your cover design purpose: Component 4: Bonus! 30 Fancy, Funky Fonts (FREE!) I have searched and collected over 30 cool, FREE fonts online that you can use in your cover designs, too! That should save you time in searching or buying funky fonts. Also, you don't have to rely on using the same, ole' default fonts installed in your computer, adding more variety to your cover designs! Imagine: The amount of money you save in hiring graphic designers to design covers for every digital product you release! The amount of time and effort you save in creating your own covers rather than using conventional and manual methods! The learning curve you get to skip - as long as you can scroll and click the mouse, your covers are guaranteed. NO gizmo design knowledge needed. P.S. Which one is more expensive? Hiring a graphic designer to do 10 covers for you at $50.00 each and wait for at least a week? Or have everything done on your own in minutes using 123 GO GRAPHICS - no graphic designing knowledge required?
