There's Only One Sure-Fire Way To Get Massive, Passive Traffic To Your Sites & Sales Pages!" Many online entrepreneurs face the same struggle every day and chances are strong that you might be dealing with this right now... You have your website, your product, some killer sales copy & a hot affiliate program. You have everything in place, ready for thousands of buyers to beat a path to your door. But... They never come. Maybe a few hits here and there, but not enough. No sales. Worse still, maybe you lose a few hundred dollars on pay per click advertising. Sometimes you may get a slight advantage and set up a few joint venture mailings but that bring 5-10 instant sales, and nothing more. It stands to reason that you'd begin the doubt process (and often yourself) ... Is it your product just isn't good enough? Is it your sales copy that's failing miserably? Is it your offer price, should you sell lower? Maybe the price... Or

the delivery... Or maybe there's just no market for your product, and you just wasted all this time!! Stop! Chances are none of those things are the real problem, because without any traffic, you'll simply never know the answer to any of those questions. The only way to know if all of those things are working is to test and guess what... Testing requires traffic. Your product could be the next big thing... Your copy could be brilliant, enticing and a guaranteed order maker... Your offer could be the best on the market... Your price could be the most reasonable... But none of that matters a jot if NOBODY sees it. And that is where Jason Potash can help. Presenting.... Content Publishing Strategies With Jason Potash See, years ago Jason was a software engineer. He was the best of the best when it came to building online software empires. He had articles syndicated everywhere offline, and his name was THE name in the software industry. One day, out of the blue, he decided to put some of his articles online... And the Internet has never been the same. Almost instantly, his articles were picked up by search engines... Slowly, as he built upon that momentum, he started getting more and more traffic. When he finally released his very first solo software project, it was an INSTANT hit. Not because he had the next big thing, or the best copy, or the best offer (although it was pretty irresistible!) It was because he had built a reputation for himself, and a source of passive traffic from his articles. And now, Simon Hodgkinson and Jeremy Gislason managed to secure the interview that can make a real difference to your online success - They have cracked open his brilliant mind! And in a very special audio interview, Jason will tell you... The WRONG way to do article marketing - Hint : Many marketers are doing this right now! The subtle patterns found in successful content sites that you can apply to YOUR articles - getting you ranked faster & higher than ever before! The powerful knowledge that Google contains - and how with one click of your mouse, you can have it at your fingertips. How being specialized & technical can HELP your search engine rankings! The "hybrid" approach to article writing that can take your results to the next level. How taking just a few minutes to develop a strategy can multiply your profits instantly. How to ethically steal other people's traffic - and have them thanking you for it! How the wrong article directories can actually hurt your efforts (even if you submit to the "right ones", too.) Big Brother is watching you - Jason will tell you how to use this to your advantage. Why determining where to submit your articles is more important than the when, why or how. How keywords with fewer searches can actually bring you MORE traffic & more sales. and so much more, you'll think you hit the traffic GOLD MINE! This interview is pure audio gold and we know you'll play it over and over getting more from it every time you do. You'll Receive: The Complete 1 Hour 48 Minute

Interview (download this instantly and listen on your PC or on your Ipod/MP3 player - Also Included is the Complete Transcript In PDF Format
