

How To Make Millions From Forex Exchange Trading Ebooks

[DOWNLOAD HERE](#)

The purpose of this ebook is to introduce the forex market to you. As with many markets there are many derivative of the central market such as futures, options and forwards. For the purpose of this book we will only be discussing the main market sometime referred to as the Spot or Cash market. The word FOREX is derived from Foreign Exchange and is the largest financial market in the world. Unlike many markets the FX market is open 24 hours per day and has an estimated \$1.2 Trillion in turnover every day. This tremendous turnover is more than the combined turnover of all the worlds' stock markets on any given day. This tends to lead to a very liquid market and thus a desirable market to trade. Unlike many other securities (any financial instrument that can be traded) the FX market does not have a fixed exchange. It is primarily traded through banks, brokers, dealers, financial institutions and private individuals. Trades are executed through phone and increasingly through the Internet. It is only in the last few years that the smaller investor has been able to gain access to this market. Previously the large amounts of deposits required precluded the smaller investors. With the advent of the Internet and growing

competition it is now easily in the reach of most investors.
