EBE combine electronic music with handmade acoustic drums and voice to create a highly progressive and thought provoking sound for a new generation. 13 MP3 Songs ELECTRONIC: Pop Crossover, ROCK: Modern Rock Details: WWW.EBEBAND.COM WWW.MYSPACE.COM/EBE EBE have built a new cornerstone into the musical establishment since their genesis at the turn of this century. Within the past six years, they have written, recorded, and performed some of the most Earth-shattering music to come out of America since the cultural explosion of the late Sixties. This is why they have given themselves the daunting task of ushering in a new era of music as a powerful cultural and artistic platform. Something needs to unify us, why not music from space?

----- After forming in the fall of 2000, Harrison Young and Daryl Anderson quickly established themselves as fixtures in the New York City underground music scene as the modern electronic duo, EBE. In the summer of 2002, they decided to refine their sound by taking their act on the road as they embarked on their first domestic tour. "This Too Shall Pass" is their third full-length studio album of all original music, the release of which marks the culmination of well over two years worth of writing and recording. Their first project, "The Logic Gate", was released in December 2002, followed in July 2003 by their second album, "The Death." EBE have had regular performances at such legendary New York City venues as CBGB's, Downtime, The Knitting Factory, and The Lion's Den. Although most of "This Too Shall Pass" was recorded at Spaceage Studios in Mahwah, NJ, several additional materials were recorded on location all around the world. Additional players on this album include Rebecca Turgel and Arash Darian. Please visit ebebandor.myspace.com/ebe for more information.
