Alternative electronica, preserving aspects of dance, trance, techno, d+b and break beat in an 11 track album with energy waving tracks to suit all occasions.. Built using past, present and futuristic production values. 11 MP3 Songs ELECTRONIC: Experimental, ELECTRONIC: Dance Details: Brief Bio: Emil 109 is a solo artist, though has been under a number of different aliases is still kicking strong, perfecting his homebrew electronica technique. With three completed unpublished albums under his belt spread over eight years, he now feels that the music industry is ready. Having already had 'The Violet Rose' featured on a DVD earlier on in the year and is still making more tracks for the DVD producer, Emil 109 is building what he calls his ultimate album, mixing all aspects of electronica, fit for all types of occasions. Emil 109s debut album Fuel Injected contains a varying mix of electronica derived music and instruments. This purely instrumental soundtrack has been orchestrated through a good selection of virtual studios and clever audio software but has never seen a recording studio. This album is a tribute of what can be created using a PC with powerful software and a good source of talent. Software is not the easiest to use at the best of times but Emil 109 has proved that it can be done. Containing 11 tracks Fuel Injected brings a certain diversity that the electronica music world is looking for. Underground sounds mixed with break beat, trance, dance, mellow, drum and bass and even a hint of pop carry the album through the carefully selected tracks. It certainly won't be everyone's cup of tea and it doesn't pretend to be, but guaranteed everyone will love at least one track. Write up featured on; emil109 and materiarecords
