Emmosea - Image A beautiful collection of ambient/downtempo instrumental soundtracks similar to those of artists like Yanni, Enya, Brian Eno etc 11 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Down Tempo Details: Emmosea is an artist based in the UK who produces ambient / downtempo soundtracks suitable for background music for film / TV, to 'music to drive to', to music to give you a sense of calm etc. The pieces on the album, Image, range from an upbeat tribute to the rainforests to ambient music suitable for meditation. I wrote the music to help people take a break from the concerns of the 'outside' and receive, if only for a few minutes, some calm and focus. Originally I learnt classical piano for some years, only in the last few years developing (as technology enabled me to), a focus on wider musical styles. Piano still plays a lead role in many of the tracks, but carefully crafted and individually designed sounds from electronic instruments complement it.
