

## Mp3 Nicholas S. Kritter - Living Art

[DOWNLOAD HERE](#)

This album is emotionally mood driven and at times experimental in electronic sound. 15 MP3 Songs  
ELECTRONIC: IDM, ELECTRONIC: Electronica Show all album songs: Living Art Songs Details: I was born in 1977 in Milwaukee, Wisconsin, U.S.A. I'm an American artist living in the U.S.A. I'm an independent solo artist. I compose, produce, and remix my own music. I also create my own music videos and digital photographic artwork using my computers as the tools to create my art. When creating digital photographic artwork I specialize in digital portraits. I started playing music as a boy, writing songs and playing guitar in alternative and punk bands during my teens and early twenties. I studied art in high school but did not have enough money to continue my studies and attend an art college, but rather began studying sound engineering at a recording engineering school. As technology advanced I made the decision to become a solo artist and making the switch from guitar playing in bands to being an independent solo artist experimenting with electronic music on computers. I also create videos mainly videos for my music. I've been posting them on YouTube. I am a starving artist. My goal is to receive major funding that will permit me to expand my art in new directions.
