

Mp3 Todd Milne - Dervish

[DOWNLOAD HERE](#)

Passionate contemporary world fusion. Flutes, guitars, violins and other world instruments and percussion over electronic beats, textures and atmospheres. 11 MP3 Songs WORLD: World Fusion, ELECTRONIC: Lounge Details: Merge Dualities: natural, textural nuance with the tight precision of technology; programmed trance loops against never-play-the-same-thing-once improvisation; experimental creation within the lineage of musics of the world's people... "When I see a piece developing in a certain direction, I throw in the monkey-wrench". UNIVERSE FUSION. My intention in creating music is to stimulate spiritual thought, feeling action through sound. A sort of sonic parable: love, struggle, awe of the universe, the wonder of nature, represented with fantastic aural imagery to engage the listener within a transcendent experience. Vast, diverse and often hard to categorize, the music combines a soulful emotional presence with often strangely unfamiliar stylings that gives you the impression of listening from another planet.
