The sound of computer audio being bent at the hands of the lack of inhibition - sometimes ambient, sometimes dark - coffee in one hand with vodka in the other. 7 MP3 Songs ELECTRONIC: Illbient, ELECTRONIC: IDM Details: Veev, or 5335 in some remote circles in the New Mexican desert, was born out of sheer curiosity with what many refer to as 'noise'. Originally beginning as 'Vendredi' in the late 80s, the ideology behind the music has remained as unabashed and open as the first takes dubbed with experimental guitars, plucked pianos, and spacious rhythm sections. Each of the pieces for Luciferin were crafted as soundscapes to life, quiet and hectic, constant and disruptive, light and dark, luciferin and luciferase. As Veev, the audio has matured in delivery; each work on this cd designed for playback on the finest of digital home theater systems.
