Details: Wyatt Moss-Wellington is a progressive folk musician, an experimental vocalist and guitarist, a composer of humanistic narratives in songform and a swell bloke. He's currently based in Sydney, Australia, but his cross-continental travels have brought folk influences from all over the world into his songwriting. The borders of nationality are broken down in his work, and the characters in his songs reflect this changing world. By turns confessional, political, intimate, humorous, surprising and experimental, he is defined by versatility and diversity of subject matter and mood. His guitar work is explorative, virtuosic and damn good fun. Wyatt's live shows are a singular experience; he aims to do at least one Amazing Thing that he wasn't expected to do, per night. At least. Roll up and enjoy the show. His debut album "The Supermarket and the Turncoat" releases January 2009.
