1-2-3 Introduction:

Thank you for purchasing the 1-2-3 Trading Signal. This is, without doubt, one of the very best chart set up patterns you will ever see. Once you train your eyes you will see them all over the place. At the beginning of a new trend. At the end of a retracement. Within a trading range. Within rising or falling trend.

Like any other pattern they are NOT 100% successful. But out of every other pattern I have ever come across in my trading career this is by far the most accurate and most profitable. If you want to become an expert in one chart pattern set up, this is it!

Whilst these patterns are 95% object ional when you become an expert in spotting them you may start to introduce a slight subjective analysis into this pattern. But for the sake of this introduction report I am only going to discuss a perfect, 100% objective 1-2-3 patterns.

On with the report. This is what I am going to explain to you:

- 1) What exactly is a 1-2-3 pattern?
- 2) Which charts and time frames do they exist?
- 3) The entry "trick"
- 4) The exit
- 5) Conclusion
- 6) Products

You will find this report quite small, compared to my other writings. My goal here is to define the 1-2-3 patterns and how to trade from it. It is not my intention to pad the report out and charge double the price.
