In 2006, when he released Henrys Diner, this writer called the Nederland-based singer/songwriter brilliant, and said that Adelman was defining roots folk Americana. His latest release, which drops this month, titled Todd Adelman and the Love Handles, follows suit. Honest, heartfelt and personal, this release showcases, once again, Adelmans ability to combine rock, country and folk into one seamless package that not only gives courteous nods to his legendary predecessors, from?Neil Young to Uncle Tupelo, but also forges its own path of uniqueness. The album also features a new backing band behind Adelman that is as impressive as the songwriting. With Bret Billings on pedal steel, Don Ambory and Greg Schochet on telecaster, Beth Amsel on harmony vocals and a rhythm section of bassist Lee Alexander and drummer Diego Voglino, Adelman delivers an album that could be one of the best country folk recordings to come out of the hills of Nederland since Nitty Gritty Dirt Band threw down tracks at the now-gone Caribou Ranch Studio. -Marquee Magazine
