From the contents: 1. Preface and Introduction to Aging research in Yeast.- 2.Oxidative stresses and ageing.- 3.The role of Mitochondria in the aging processes of yeast.- 4.The Retrograde Response and Other Pathways of Interorganelle Communication in Yeast Replicative Aging.- 5. Chronological Aging in Saccharomyces cerevisiae.- 6. Still waters run deep: Aging and the survival of quiescent and non-quiescent cells in yeast stationary-phase cultures.- 7. Maximising the yeast chronological lifespan.- 8.Amino Acid Homeostasis and Chronological Longevity in Saccharomyces cerevisiae.- 9. DNA damage and DNA replication stress in yeast models of aging.- 10.Yeast aging and apoptosis.-11. Cellular homeostasis in fungi: Impact on the aging process.- 12.Genome-wide analysis of yeast aging.- 13. Genetic Approaches to Aging in Budding and Fission Yeasts: New Connections and New Opportunities.- 14. Evolution of asymmetric damage segregation: a modelling approach.-15. Cellular ageing and the actin cytoskeleton. EAN/ISBN : 9789400725614 Publisher(s): Springer, Berlin, Springer Netherlands  
Discussed keywords: Hefe Format: ePub/PDF Author(s): Breitenbach, Michael - Jazwinski, S. Michal - Laun, Peter
