WARNING THIS HAS TEETH...His first release reflects the scope of his musical diversity with scintillating and eclectic jazz that escalates from the solace of a shimmering brook to a kaleidoscope of carefree, avant-garde zest and motion. 10 MP3 Songs JAZZ: Jazz Fusion, JAZZ: Acid Jazz Details: He composes only after purging each and every possible influence on his art. When he begins a piece there is no other music, no predecessor to his work, no other sound. he reaches his environment and his interaction with others to the barest minimum. And listens to the music within. That is why the music you hear from him sounds so unlike anything else. It isn't really meant to be Music. But Art in its purest sense. Not meant to touch Everyone.
