Revolutionary Software Suite Instantly Creates Unique Articles For Better Search Engine Rankings, More Site Visitors, And More Money! There's really no question that creating and distributing articles will help you generate a ton of back links, improve your search engine rankings, generate more traffic and make money online. Too bad writing articles can be a gigantic pain in the ass. ... yes creating your own articles from scratch can be EXTREMELY PAINFUL. If you're doing it ALL by yourself, you could dedicate hours, days, or even longer to write your own articles. Now, some would say, "Hire it out"... bring in some outsource authors and just pull the puppet strings and let THEM do all this hard work for you. Great strategy expensive strategy but great when it works right, and assuming you have cash to burn. I mean to

get a "quality" "readable" article youd probably spend \$5 to \$10 to have the each article written. Others would say "why not use PLR (private label right) articles?" But there's a RUB here, too. Ever hear about the "Duplicate Content Penalty" and the "Google Sandbox?" Yep, using PLR articles runs the risk that your sites get moved to the Google pergatory... never to be seen. So how can you solve this problem? Actually, it is very easy: Use spin ready articles to create hundreds of unique articles with the click of a button! By using these special articles that are in spin format (spin ready articles), you can pump out hundreds or even thousands of articles that are unique in Googles eyes. Spinner Pro Software is a suite of TWO brand new software products that make writing spinnable articles or turning existing PLR content into unique spun content a breeze. + Power Tool #1: Spin Writer Pro Spin Writer Pro gives you the perfect blend of the speed of auto spinning with the quality output associated with manual writing. So what is it? Its a specially designed editing tool with synonym look up that can generate spyntax as you go. This means you can put the spin variations in as you write and when youre done push a button and produce loads of unique versions of the same article. In the time it takes you to do one article you are getting twenty, fifty or even a hundred unique spun versions. And this isn't limited to writing your own articles... + Power Tool #2 Easy Auto Spinner Although I recommend that you create all your spun content using the power of Spin Writer, there are times when you just need to quickly pump out some variations of PLR articles quickly and without any manual editing. So included in the Spinner Pro Software Suite is Easy Auto Spinner. Just give Easy Auto Spinner a folder that contains PLR text files and an output folder for the spun content, decide how unique you want it to make the content and click a button. Just minutes later you will have fresh, unique versions of those articles ready for use. The PLR text files don't have to have any spyntax or special codes in them, they are just plain old regular PLR text files. Easy Auto Spinner will spit out spun versions using one of two methods (or it can use both methods at once). And each time you run Easy Auto Spinner on a folder it will produce different spun content.
