

Advancing The Frontiers Of Simulation

[DOWNLOAD HERE](#)

Preface.- George Fishman s professional career.- A conversation with George Fishman.- Computer intensive statistical model building.- Patchwork distributions.- Asymptotic validity of batch means steady-state confidence intervals.- Efficient modeling of delays in discrete-event simulation.- Sampling from linear multivariate densities.- Factor screening in simulation experiments: review of sequential bifurcation.- F2-Linear random number generators.- Opportunities and challenges in health care simulation.- Future trends in distributed simulation and distributed virtual environments.- Combined screening and selection of the best with control variates.- Optimal linear combinations of overlapping variance estimators for steady-state simulation.- Author index. EAN/ISBN : 9781441908179 Publisher(s): Springer, Berlin, Springer US Format: ePub/PDF Author(s): Alexopoulos, Christos - Goldsman, David - Wilson, James R.
