Xerox Wide Format 8850/510dp Service Manual&Parts List This service repair manual has Detailed Pictures, Diagrams, It gives complete step by step information on repair, servicing and preventative maintenance. This manual is highly detailed to help guide you through every repair and troubleshooting procedure. The manual contains all you need to know to keep your photocopier working right. It save cash fixing the photocopier yourself instead of paying someone else to do so. Become you a photocopier expert. Organization This manual consists of eight sections. The title and description of each section are listed below.

Section 1. - Service Call Procedures This section contains the following: Call Flow Procedure Initial Actions/ System Checks Print Defect Isolation Procedure Workstation Checkout Procedure Status Code Entry Chart Message Display Entry Chart Maintenance Procedures Callback System Checkout/ Final Action

Call Flow Procedure The Call Flow Procedure is a list of activities to be performed on each service call.

Initial Actions/ System Checks This procedure is designed to identify and classify the problem and to refer you to the appropriate RAP in order to repair the problem. When the problem has been repaired, perform the Final Action.

Print Defect Isolation Procedure This procedure directs the CSE to make test prints, perform test procedures to identify the cause of a print defect.

Workstation Checkout Procedure This procedure is designed to ensure that the printer is correctly set up to run and communicate with other elements. It consists of a series of connection checks, configuration test prints, PING tests, and tests made from a laptop PC.

Status Code Entry Chart This table provides a list of status codes, a description of the problem, the components that are affected, RAPs that may resolve the problem, as well as BSD references and Parts List references.

Message Display Entry Chart This table contains a list of messages that may be generated by the printer, their cause, clearance procedures, and

BSD references.

Maintenance ProceduresThe Maintenance Procedures identifies functional checks and cleaning operations that must be performed on every Normal Call. It also identifies those activities that can be performed as needed or as scheduled.

CallbackThis service is performed when the CSE has been called back to correct a problem that was thought to have been recently corrected. The Callback is a short procedure performed on only that subsystem that caused the original service call.

System Checkout / Final ActionThis procedure is used to verify that the printer is operating correctly after a repair, and that the correct steps are taken to close out a service call.

Section 2. - Repair Analysis Procedures (RAPs)This section contains the Repair Analysis Procedures (RAPs) necessary to repair the faults. When using a RAP, always exit the procedure when the fault is fixed. Do not perform the remaining steps.

Section 3. - Image Quality Repair Analysis Procedures (RAPs)This section contains the Repair Analysis Procedures (RAPs) necessary to repair the image quality faults. Refer to How to Use the Image Defect Definitions to compare the image defect to the definitions. Once you have determined the definition that best describes the defect, go to the section contents page to find the appropriate RAP. When using a RAP, always exit the procedure when the fault is fixed. Do not perform the remaining steps.

Section 4. - Repair / AdjustmentThis section contains the repair and adjustment procedures for the 8850/510dp printers.

Section 5. - Parts ListThis section contains the detailed Parts List for the 8850/510dp printers.

Section 6. - General ProceduresThis section contains Diagnostic Procedures, Installation Procedures, and General Information, which includes Product Specifications for the 8850/510dp printers.

Section 7. - Wiring DataThis section contains the BSDs.
