

Agent-based Semantic Web Service Composition

[DOWNLOAD HERE](#)

Agent-based Semantic Web Service Composition closely examines the various aspects of SWS composition, and explores the concept that a Multi-Agent system can serve as an SWS composition system in which its agents can interact with one another to satisfy a high-level goal. In addition to surveying various proposed multi-agent-based SWS composition models, the book also highlights the cognitive parameter-based semantic web service selection models that can be used in multi-agent-based SWS composition, and outlines a new negotiation agreement-based SWS composition that can outperform existing techniques. Agent-based Semantic Web Service Composition is intended for researchers and practitioners as a reference guide for optimizing SWS composition and implementing multi-agent systems. Instructors and other academics working in a related field will also find the book invaluable. EAN/ISBN : 9781461446637 Publisher(s): Springer, Berlin, Springer, New York Discussed keywords: Semantic Web Format: ePub/PDF Author(s): Kumar, Sandeep
