

# Poker Rng.win At Online Poker Today!!!

[DOWNLOAD HERE](#)

What RNG stand for is random number generator. Every online poker site whether you are in the US (yes there are still places you can play) or another country have RNGs determining what cards go to what players and what the flop, turn, and river will be. What this program does is a database. You input your cards along with the flop, turn, and river, and after between 3000-6000 hands the program is able to figure out what the RNG is doing so it will help you know eventually what the next cards coming will be, and after so long you will also see little heart, club, spade, and diamond symbols letting you know that there will be 3 of that suit in the hand, so if you see a club symbol you know that 3 clubs are coming. Works great in tournaments to build the database and works at any online casino. Comes complete with a manual for easy start up, and works on any platform. (Included a video on youtube) sorry it's kinda blurry it was one of my first uploads so was new to it/
