From: Your Name Dear Friend, Suddenly, I felt a huge wave of fear for no reason at all. My heart was pounding, my chest hurt, and I could barely breathe. I was sure I was dying. Im so afraid. Every time I start to go out, I get that awful feeling in the pit of my stomach and Im terrified that another panic attack is coming or that some other, unknown terrible thing was going to happen. Have you felt the terrifying onset of an anxiety attack? Do you suffer from panic attacks or its associated symptoms? Well, you are not alone. Many people from all across the globe are admitting that they experience anxiety and panic attacks. This is a very unfortunate, but totally unnecessary situation. Are you suffering from any of these symptoms right now? Light Headedness - Have you experienced dizzy spells or light headedness that lead to fainting spells? Breathing Difficulty - Do you get or have you experienced difficulty in swallowing, followed by shortness of breath? Speeding Heart - Have you experienced a pounding heart with tingly sensations all over your body? Chest Pain - Do you think you are having a heart attack, but your doctor says your heart is as healthy as a horse? Overwhelming Fear - Do you or have you felt overwhelming terror that something terrible is about to happen? These and other similar uncomfortable emotions occur all too often but the truth is you do not have to experience another panic or anxiety attack ever again - as youll soon see. Over the years, I have worked with many people dealing with the numerous anxiety disorders. They have usually reached the end of their rope (or so they believe) looking for an effective answer everywhere. By the time they get here, they are very skeptical and have little faith that they will ever get over their anxiety. This doesnt have to be the case with you. Imagine a Life Free From The Heavy Burden of Anxiety... Do you ever consider what it would be like to wake up free of anxiety... do you ever think back to those long-gone days before your first first panic attack? Now, let yourself imagine... Laughing with your loved ones as you go about your daily activities and never fearing for their safety or yours Sleeping soundly through the night, dreaming of wonderful, happy places and people Heading to work everyday, happy in your job and with your co-workers. Excited about the projects you are working on and the challenges they will bring Ready to take on the world with joy and enthusiast. Confident that no matter what happens, you can deal with it easily Does this sound too good to be true to you? Keep an open mind, because it is true and you can experience that lightness of heart and that joy of living once more... When I was constantly anxious (for 20 long years), I checked out all the research papers my doctor would give me and I read every pop-psychology book I could lay my hands on. There was however still something missing from all I read... I realized that what might work for some people may not work for

another. It was thru trial and error that I hit upon the perfect combination for me. No one knows what the perfect combination is for you... But what i do know is that you can find it. All you have to do is do what I did. It took me years, but it doesnt have to take you that long. These years of experience are shared with you in my best selling... How to Stop Anxiety Attacks ...was perfect for me! Hi, This book was perfect for me (a New Yorker), because I am the typical city man: fast paced life, lots of stress, and lots of anxiety. My high stress lifestyle, is derived from my high stress job. I almost didnt have time to read this book in fact, until my therapist insisted that I do so.
