

# Apphp Easyinstaller

[DOWNLOAD HERE](#)

ApPHP EasyInstaller is an easy-to-setup PHP script for creating a user-friendly installation wizard. The script is suitable for existing and new web applications. If you're planning to create an application in PHP and search for a small, customizable and powerful installation module, then ApPHP EasyInstaller is the best solution for you. This Installer uses a simple wizard-driven interface (a form containing questions and a Next Step/Continue buttons) and will allow anyone without any programming knowledge to easily install cgi or php scripts on any server with just a few mouse clicks! The ApPHP EasyInstaller script makes the installation process as simple as possible; it may be easily customized for any project. The goal of this script is to make installation of scripts on a web-server as easy as installation of software on a personal computer.
