Facebook Video Timebomb App PRIVATE LABEL RIGHTS INCLUDED! The Facebook Video Timebomb App is a hybrid application for Facebook pages. It plays YouTube videos and has the controls stripped out so that the viewer doesn't get click happy and end up in YouTube land. Here's the kicker with this app. After the video is done playing it automatically changes the video into a HTML page, picture, another video, email subscriber box, or order form. Using this app increases an actionable experience from the user ... meaning once the video is done playing they don't have to scroll away, click a button, or guess what action to take next it's automatically done for them. If you're promoting a local business and you're trying to increase their revenue this app is a gem. If you're an affiliate selling others products it works great at positioning your offers to convert oh so well. \_\_\_\_\_ Visit My Store For More Deals!!!
