"Create Killer 3D Displays Out Of Any Images, Photos Or Screenshots!" With 3D Web Display Maker you can create killer looking web displays for all your images, photos and screen grabs... just like the "coverflow" effect on the iPhone. This is a great way to show off your websites and products to others. And the best part is, you can create this nice look with just a few clicks using the new 3D Web Display templates. These templates are based on Photoshop "smart objects" that do all of the hard work of creating these 3D displays for you. All you have to do is click a few buttons. All it takes is 5 easy steps: Double click on the smart object layer. This will open up the template area where you insert your image. Insert your image here. This can be any image, photo, screen grab, or even a layered design. Click save and the Web Display template gets updated with your newly added image. The smart object transforms and distorts the image for you and turns it into a cool 3D display. It even creates a reflection for your image automatically. Repeat the above steps for each of the smart objects on the Web Display template to add more of your images. Thats it. All it takes is just a few clicks. The smart objects do the rest. There's no need to run any action scripts, or to create these displays by hand yourself. Just double click on the Smart Object Layer, paste in your image, and your image gets transformed automatically. And you can do this as many times as you like, adding as many new images as you want. So you can create as many of these Web Displays as you want, in minutes. You also get a variety of different "looks" in a variety of different angles and viewpoints... 11 Different 3D Displays To Choose From... All of these templates come with neatly organized and named layers for super easy editing. All of the effects like highlights, reflections and shadows are already in place. All you have to do is double click on the Smart

Layers, paste in your images, and you're done. These templates come in a fairly large sizes that can be used for many different projects, and you can resize them to fit your needs.
