This book traces the evolution of Aid for Trade and examines the global architecture, modalities, and costs associated with its implementation. Following in the wake of the World Trade Organization's engagement with Aid for Trade, this book brings together a range of perspectives around this emerging issue. The collection of articles in this volume presents many of the ideas elaborated through research conducted by International Lawyers and Economists Against Poverty (ILEAP) since 2005 and is intended to provide a basis for further study. Since many of the contributions on aid for trade to date have come from the North, the book looks to deepen the debate by forwarding voices and experiences from the South. The book traces the evolution of Aid for Trade from its beginnings and examines the global architecture, modalities, and costs associated with its implementation. Drawing on lessons from national and regional experiences, this book further explores ways in which Aid for Trade can both move forward and become a real tool for poverty reduction in beneficiary countries.
