Algorithm-architecture Matching For Signal And Image Processing

[DOWNLOAD HERE](#)

Preface. Part 1: Architectures for embedded applications. Chapter 1: Architectures for image processing. Chapter 2: Architectures for signal and telecommunication processing. Part 2: Data acquisition and embedded systems. Chapter 3: Sensors for data acquisition. Chapter 4: Operators for embedded systems. Chapter 5: Partial and dynamic reconfiguration for signal and image processing. Part 3: Embedded systems design. Chapter 6: RTOS for embedded systems. Chapter 7: Scheduling of embedded systems. Chapter 8: CAD tools for signal and image processing. EAN/ISBN : 9789048199655 Publisher(s): Springer Netherlands, Springer Science & Business Media Format: ePub/PDF Author(s): Gogniat, Guy - Milojevic, Dragomir - Morawiec, Adam - Erdogan, Ahmet
